

1| Project SOW

Project Scope

Taking a Raspberry Pi and installing and enabling a VPN service. I, Michael Horton Project Manager, will be taking a raspberry pi and will install and configure it so it can run a VPN service so that I can decrease the risk of valuable information being taken while browsing the web. I will be using a website as a tutorial while creating my own to properly install and set up this service. It should take me 1 to 2 weeks to configure and solve any bugs that may occur before fully operational.

Project: VPN Service

Overall Status: <select from

ON TRACK

/ AT RISK

/ BLOCKED

/ ON HOLD

Major Milestones

| Stage | Date & Status |
|-------------|---------------|
| Milestone 1 | 3/12/2021 |
| Milestone 2 | 3/15/2021 |
| Milestone 3 | 3/17/2021 |
| Completion | 3/19/2021 |
| | |

<List key milestones. Color of cell indicates status.>

Project Team

| Responsibilities | Name |
|------------------------|----------------|
| Installing VPN Service | Michael Horton |
| Formatting VPN File | Michael Horton |
| Debugging | Michael Horton |
